Pranav Anil Kavade

Ichalkaranji,India | +91 8767524561 | pranavkavade9@gmail.com | Linkedin/pranavkavade20

EDUCATION

Master's of Computer Application – Sanjay Ghodawat University **2023 - 2025**
CGPA : 8.14/10.00 Kolhapur, India

Bachelor of Science in Computer Science – Dattajirao Kadam Arts, Science & Commerce College **2020 - 2023**
CGPA : 9.42/10.00 Ichalkaranji, India

SKILLS

Languages & Tools : Python, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks: React, React Native, FastAPI, Django, Django REST Framework, Tailwind CSS, Git, GitHub, Postman, Docker
Databases: PostgreSQL, MongoDB

EXPERIENCE

Software Engineer | DASP Digital Pvt. Ltd. | Pune, India **November 2025 - Present**

- Maintain and enhance 3+ existing product systems, including user management, payment, and business workflows, by implementing new requirements and improving functionality using React, React Native (Expo), Python, and FastAPI.
- Develop and modify RESTful APIs and CRUD operations using FastAPI, integrate frontend components with backend services, and implement authentication and authorization workflows.
- Configure Role-Based Access Control (RBAC) for 5 user roles, supporting identity management, access permissions, and secure application workflows.
- Manage PostgreSQL database operations, troubleshoot bugs, test enhancements, and support deployment and production issue resolution using Docker, Git, GitHub, and Postman.

Frontend Developer Intern | ScaleFull Technologies | Pune, India **January 2025 - April 2025**

- Developed responsive and reusable UI components using React.js and Tailwind CSS, implementing client-side navigation with React Router DOM and state management with Context API and React Hooks to improve maintainability and user experience.
- Designed 7+ MongoDB schemas and integrated Node.js, Express.js, and RESTful APIs for backend data management; implemented Cloudinary media storage for 80+ images and used Postman for API testing, debugging, and client-server integration.

PROJECTS

Farmket - Farmer & Buyer Marketplace Web App
Github/pranavkavade20

- Architected a direct-to-consumer agricultural marketplace with 3 role-based access levels (buyer, farmer, admin), securing transaction flows and eliminating intermediaries between farmers and consumers.
- Built an asynchronous crop tracking and reservation engine using Django REST Framework, Celery, and Redis — monitoring 4 stages of crop growth and enabling buyers to pre-book future yields, securing guaranteed agricultural demand.
- Engineered a real-time negotiation system using Django Channels and WebSockets, enabling instant messaging, location sharing, and file attachments across all 3 user roles to accelerate supply chain collaboration.

Recipy - Recipe Assistant Web Application
Github/pranavkavade20

- Engineered an ML-powered recommendation system using Scikit-learn and FAISS (Facebook AI Similarity Search) to deliver personalized recipe suggestions from a dataset of 4,300+ recipes.
- Optimized Django REST Framework API endpoints and PostgreSQL database queries via Django ORM, reducing API response latency by 52%.
- Integrated YouTube Data API to surface 2–3 related cooking videos per recipe, and designed a responsive Tailwind CSS UI with Jinja2 templates for an enhanced user experience.

CERTIFICATION

- Career Essentials in Generative AI – Microsoft and LinkedIn
- Prompt Design in Vertex AI – Google Cloud Skill Badge
- Google Project IDX workshop – Bolt IoT
